Collecting surplus IT equipment from businesses for reuse before recycling corporate IT hardware. Performing secure data wiping with NIST 800–88 compliance, and reusing laptops upgraded with open-source software.

Some of these suitable items are then donated to disadvantaged older adults, prioritizing accessibility features like larger screens to suit vision impairments for older people with Age UK London. This initiative not only reduces Scope 3 CO2 emissions by reusing tech

instead of recycling but also bridges the digital divide, empowering seniors to connect with family, learn new skills, and engage with the world.

Consider the story of an 80-year-old gentleman supported by Age UK Islington. Facing profound isolation due to vision impairment and health issues, his phone was inadequate for video calls with overseas family. Limited mobility further restricted his access to services. Through SocialBox.Biz's donation, he received a reused laptop with a larger screen and open-source software, enabling clear video chats and online resource exploration. This simple device reconnected him with loved ones and opened doors to independence.

Another inspiring case comes from Age UK Westminster. A client without a personal computer expressed gratitude for their first Chromebook: "I've never had a laptop, and I'm grateful for the Chromebook. I'm learning all the time and connecting with family more often. A new toy!" This donation facilitated faster browsing and digital literacy, allowing the user to stay in touch with friends and explore online activities from home.

At Age UK City of London, the Device Loan scheme has flourished in 2025. Through in-person sessions and newsletters, clients are introduced to privacy-respecting, open-source software on donated laptops. One participant joined virtual coffee mornings, reducing isolation, while another volunteer maintained connections for community work. These stories illustrate how reused tech fosters confidence and combats loneliness.

The broader impact of this partnership extends beyond individuals. By promoting reuse before recycling, SocialBox.Biz London reduces the e-rubbish problem in the UK, supports corporate social responsibility for donating businesses, and advances computer skills across the community. It's a win-win: companies cut their carbon footprint, and older adults gain tools for education, jobs, and social engagement.

Businesses looking to make a difference are encouraged to partner with SocialBox.Biz. Donate your surplus laptops today and help bridge the digital gap for London's seniors. Visit socialbox.biz/reuse-before-recycling/ to learn more and schedule a secure pickup. https://www.socialbox.biz/reuse-before-recycling/
